

Industrial Overlock Sewing Machine for Edge Finishing

This light industrial overlock sewing machine is designed for edge finishing and seaming of fabrics. It features adjustable stitch length and width settings, and a differential feed system.

Product Overview

Industrial Overlock Sewing Machine

This light industrial overlock sewing machine is expertly designed for professional edge finishing and seaming. Its robust, compact build makes it an ideal solution for small to medium-scale production environments. Equipped with a high-speed motor and a precision cutting mechanism, it ensures efficient operation and consistent, high-quality results across various fabric types.

Technical Specifications

Application	Edge finishing and seaming
Thread System	Multi-thread
Key Features	Precision cutting mechanism, Differential feed system, Adjustable stitch length, Adjustable stitch width

Performance & Maintenance

Performance Metrics

1 Auto

Lubrication System

Operational Benefits

- Prevents fabric puckering
- Prevents fabric stretching
- High-speed motor for efficiency
- Long-lasting performance

Applications

Usage Environment

Small-scale production • Medium-scale production • Garment manufacturing • Textile applications
