

Industrial Overlock Sewing Machine for Garments and Shoes

This industrial overlock sewing machine is designed for manufacturing garments, shoes, and accessories. It provides precise stitching and efficient operation, making it suitable for high-volume production environments.

Overview

High-Efficiency Industrial Overlock Machine

This industrial overlock sewing machine is engineered specifically for high-volume manufacturing environments, including garment production, footwear, and accessories. It features a robust construction designed for durability and consistent, precise stitching performance. With adjustable settings and multi-thread capabilities, it offers the flexibility and efficiency required for professional-grade textile assembly.

Technical Specifications

Key Features

- Multi-thread capability
- Adjustable stitch settings
- Robust industrial construction
- High-volume production ready

Performance Highlights

1 High

Stitch Precision

1 High

Production Volume

Model Number

BSW562-01GB

Suitable Applications

Garment Manufacturing, Footwear Production, Accessories Assembly
