

Industrial Overlock Sewing Machine for Garments and Shoes

This high-speed industrial overlock sewing machine is designed for garment, shoe, and accessory manufacturing. It features adjustable settings for various fabric types and thicknesses, ensuring consistent seam quality.

Overview

High-Performance Industrial Overlock Machine

Designed for demanding mass production environments, this industrial overlock sewing machine offers robust construction for continuous operation. It features precision stitching mechanisms that ensure consistent seam quality across a variety of fabric types and thicknesses. With an ergonomic design and user-friendly control panel, it enhances operator efficiency for serging, hemming, and edge finishing applications.

Technical Specifications

Target Industries

Garment Manufacturing • Shoe Production • Accessories

Key Features

- High-speed operation
- Robust construction for continuous use
- Precision stitching mechanism
- Adjustable settings for various fabric thicknesses
- Ergonomic design
- User-friendly control panel

Suitable Applications

Serging, Hemming, Edge Finishing
