

Industrial Paint Spray Gun

This industrial paint spray gun is designed for a variety of coating applications. It features durable construction and adjustable settings for optimal paint flow and atomization.

Overview

Industrial Coating Solution

This industrial paint spray gun is engineered for high-performance coating applications across automotive, manufacturing, and construction sectors. Featuring a durable construction, it provides the reliability required for professional environments. Users can benefit from precision-engineered adjustable settings that ensure optimal paint flow and consistent atomization for a high-quality finish.

Performance

Maximum Pressure

3.5 KG

Maximum Pressure

Pressure in LBS

50 LBS

Applications

Industry Suitability

Automotive, Manufacturing, Construction

Design

Core Features

- Durable construction
- Adjustable paint flow settings
- Adjustable atomization control
