

Industrial Parts Cleaning Machine

This industrial cleaning machine is designed for efficient and thorough cleaning of parts and components. It features a robust construction with multiple rollers for material transport and a control panel for operation adjustments.

Overview

Industrial Parts Cleaning Solution

This industrial cleaning machine is engineered for the efficient and thorough cleaning of various mechanical parts and components. Featuring a robust construction with an integrated roller system for seamless material transport, it ensures high-precision cleaning suitable for demanding industrial environments. The intuitive control panel allows operators to make precise adjustments for diverse application requirements.

Technical Specifications

Application Suitability

- Industrial parts cleaning
- Component surface preparation
- Automated production lines

Model Number

BCXW-1300/1500B

Key Features

Robust Construction, Roller Transport System, High-Precision Cleaning, Adjustable Controls
