

Industrial Parts Cleaning System

Automated system designed for cleaning industrial parts. It features a multi-stage cleaning process, integrated control panel, and robust housing.

Overview

Industrial Cleaning Efficiency

The YFO-6096T is an automated industrial cleaning system engineered for consistent, high-efficiency performance. Designed with a robust, enclosed housing and multi-stage processing capabilities, this unit ensures thorough cleaning for a wide range of industrial components. Integrated control systems and status signaling provide operators with real-time oversight of the cleaning cycle.

Technical Specifications

Model Number	YFO-6096T
Cleaning Application	CLEAN-OIL

Key Features

Core Capabilities

- Multi-stage cleaning process
- Automated operation cycle
- Integrated control panel with display
- Operational status signal tower
- Robust enclosed housing design

Status Indicators	Control Panel, Display Screen, Signal Tower
