

Industrial Parts Washing Machine

This industrial parts washing machine is designed for heavy-duty applications. It features multiple cleaning stages with rollers, pipes, and a system of nozzles and sprayers for effective cleaning of industrial parts.

Overview

Industrial Cleaning Performance

This industrial parts washing machine is engineered for heavy-duty cleaning applications in demanding manufacturing environments. Featuring a robust construction with a durable yellow finish, it utilizes a complex system of rollers, pipes, and mechanical components to ensure thorough cleaning. The integrated series of nozzles and sprayers provides consistent coverage, making it an ideal solution for maintaining various industrial parts and components.

Technical Specifications

Suitable For

- Heavy-duty industrial parts
- Mechanical components
- Automotive parts
- Manufacturing hardware

Build Quality

Heavy-duty • Industrial Grade • Reinforced

Cleaning System

Multi-stage cleaning, High-pressure nozzles, Integrated sprayers, Roller transport system
