

Industrial Pipe Pump

This pipe pump is engineered for efficient fluid transfer in industrial and commercial settings. Its durable construction features a corrosion-resistant cast iron body and a high-performance electric motor with optimal thermal management.

Overview

Industrial Pipe Pump

This robust industrial pipe pump is engineered for efficient fluid transfer in demanding commercial environments. Featuring a durable cast iron body with a high-quality powder coating, it ensures long-term resistance to corrosion and wear. The unit is equipped with a high-performance motor, a stainless steel welding shaft, and a precision-engineered brass impeller for reliable, continuous operation.

Performance Metrics

Maximum Pressure	10 bar
Liquid Temperature Range	0°C - 90°C
Max Ambient Temperature	40 °C

Technical Specifications

Model Number	50CFG751
Certifications	CE
Service Duty	S1 (Continuous Service)

Construction & Materials

Material Composition

- Stainless steel welding shaft
- Brass impeller
- Cast iron body
- Anti-rust stainless steel sheet

Protection & Safety

Protection Class

IP44

Safety Features

- Inner thermometer protector

Insulation Class

B
