

# Industrial Pipeline Gate Valve

This industrial gate valve is designed for controlling fluid flow in pipelines. It features a flexible wedge and can be configured with either a threaded or welded seat.

## ADDITIONAL IMAGES

## Product Overview

### Industrial Pipeline Gate Valve

This industrial gate valve is engineered for precise fluid flow control in demanding pipeline systems. Featuring a robust metal body and secure flanged connections, it is designed to withstand high-pressure environments while ensuring reliable shut-off functionality. The full-bore design minimizes pressure drop, making it an ideal solution for applications requiring efficient and consistent performance.

## Technical Specifications

### Pressure Ratings

**150 lb**

Class Rating

**1500 lb**

High Pressure Class

<b>Material Composition</b>	WCB (Cast Carbon Steel)
<b>Operation</b>	Manual Handwheel
<b>Connection</b>	Flanged

## Features

### Key Benefits

- Full bore flow design
- High-pressure resistance
- Corrosion-resistant construction
- Reliable shut-off functionality

<b>Suitable Applications</b>	Industrial Pipelines, Fluid Control, High-Pressure Systems
