

Industrial Piston Air Compressor

This heavy-duty piston compressor is designed for demanding industrial use. It utilizes a twin-cylinder pump to ensure high air delivery and efficient operation.

Overview

Heavy-Duty Industrial Performance

This industrial piston air compressor is engineered for demanding professional environments requiring reliable, high-volume air delivery. Featuring a robust twin-cylinder pump design, it ensures efficient operation and consistent performance. The unit includes a large-capacity air receiver to support extended tool usage and minimize motor cycling, making it an ideal solution for intensive industrial applications.

Technical Specifications

Key Components

- Pressure regulator
- Safety valve
- Pressure gauge

Pump Configuration	Twin-cylinder
Portability	Yes
Application Suitability	Industrial, Heavy-Duty, Professional
