

Industrial Piston Air Compressor with Horizontal Tank

This piston-type air compressor is designed for industrial applications. It features a horizontal tank for compressed air storage, enhancing stability and reducing space requirements.

Overview

Industrial Performance and Reliability

This industrial piston-type air compressor is engineered for robust performance in demanding environments. Featuring a stable horizontal tank design, it optimizes space utilization while maintaining consistent air pressure. The unit is equipped with a belt-drive motor system for efficient power transfer and integrated mobility wheels, making it a versatile solution for powering various pneumatic tools and equipment.

Technical Specifications

Suitable For

- Pneumatic tools
- Industrial equipment
- Workshop applications

Model ID

AV-0.48/8

Drive System

Belt-drive

Key Features

Horizontal Tank, Pressure Regulator, Pressure Gauge, Mobile Wheels
