

# Industrial Planetary Food Mixer

This heavy-duty industrial planetary food mixer is designed for commercial baking and food processing applications. It can handle large batches of dough, batter, and other ingredients with ease and includes a stainless steel bowl and various attachments.

## Overview

### Professional Industrial Planetary Mixer

This industrial planetary food mixer is engineered for high-performance commercial food preparation. Featuring a food-grade stainless steel construction for contact surfaces, it ensures hygiene and durability in demanding kitchen environments. The unit utilizes a robust belt-driven system for low-noise operation and reliable power, making it an essential tool for bakeries and food service establishments.

## Technical Specifications

### Mixing Speeds

- 110
- 178
- 355

Bowl Capacity	10 L
Drive Mechanism	Belt Type

## Features & Compliance

### Key Features

Removable Bowl • Low Noise • Strong Power

Construction Material	Stainless Steel (Food Contact Surfaces)
Certifications	CE, RoHS
