

Industrial Plastic Flange with Rubber Seal

This plastic flange is designed for industrial and machinery applications. It features a rubber seal to ensure tight connections and prevent leaks in fluid or gas handling systems.

Product Overview

Industrial Plastic Flange Assembly

This industrial plastic flange is engineered for robust performance in fluid or gas handling applications. Featuring a durable, corrosion-resistant plastic construction, it includes an integrated purple rubber gasket to ensure a tight, leak-proof seal. The assembly is equipped with electronic control interfaces, making it suitable for modern automated systems requiring precise monitoring.

Technical Specifications

Seal Color

Purple

Integrated Features

- Electronic control interface
- Digital display
- Control buttons

Material Composition

Industrial-grade plastic

Sealing Component

Integrated rubber gasket

Key Attributes

Application Suitability

Industrial, Machinery, Fluid Handling, Gas Handling

Durability

Corrosion Resistant, Wear Resistant
