

Industrial Plate Making and Printing Machine

High-precision plate making and printing machinery designed for industrial applications. This equipment ensures accurate and efficient plate production for various printing processes.

Overview

High-Precision Industrial Printing Solution

This industrial plate making and printing machine is engineered for high-precision applications in professional printing environments. Featuring a robust design and advanced control systems, it ensures consistent and reliable performance for various plate materials. It is an ideal solution for businesses seeking efficiency and accuracy in their plate production and printing workflows.

Technical Specifications

Model Identifier	PM 52-4 HI 750
Primary Applications	Industrial Printing, Plate Production, Professional Printing

Key Features

Construction

Robust Construction • Advanced Control System

Material Compatibility

- Wide range of plate materials
