

# Industrial Pneumatic Valve with Flanged Connections

This industrial pneumatic valve is equipped with flanged connections for secure installation. It features a robust body, brass stem, and red handwheel, enabling manual operation for controlling fluid or gas flow.

## Overview

### Industrial Pneumatic Valve

This industrial pneumatic valve is engineered for reliable fluid and gas flow control in demanding environments. Featuring a robust construction with a black body and brass stem, it is designed for durability and precise operation. The integrated red handwheel allows for easy manual control, making it a versatile solution for various industrial pneumatic systems.

## Design & Construction

### Connection Type

Flanged

### Body Material

Robust Industrial Grade

### Stem Material

Brass

### Operation Method

Manual Handwheel

## Application

### Intended Use

Pneumatic Systems, Fluid Control, Gas Flow Control
