

Industrial Polishing Machine

This machine is used for polishing nails, craft carvings, and dentures. It is also suitable for artificial limb polishing and mould polishing.

Product Overview

Precision Polishing Solution

This industrial polishing machine is engineered for high-precision surface treatment across diverse applications. Designed for versatility, it supports tasks ranging from delicate craft carving and nail care to robust mould and denture polishing. With features like variable speed control and hands-free foot pedal operation, it provides the control and consistency required for professional results in metalworking, woodworking, and plastics industries.

Applications

Primary Applications

Nail Care, Craft Carving, Denture Polishing, Artificial Limb Polishing, Mould Polishing

Features

Key Operational Features

- Variable speed control dial for intensity adjustment
- Hands-free foot pedal operation
- High-torque motor for consistent performance
- Flexible cable for enhanced maneuverability
- Durable handpiece design

Industry Suitability

Suitable Industries

Metalworking • Woodworking • Plastics • Dental/Medical
