

Industrial Portable Power Distribution Box

This portable power distribution box is designed for industrial applications and demanding environments. It features multiple outlets with varying voltage and current ratings, along with safety features such as circuit breakers and overload protection.

Product Overview

Industrial-Grade Power Distribution

This portable power distribution box is engineered for demanding industrial environments, offering a robust solution for temporary electrical setups. Designed with durability in mind, it features impact-resistant construction and integrated safety mechanisms, including leakage protection switches and miniature circuit breakers. With versatile outlet configurations, it is an ideal choice for construction sites, workshops, piers, and outdoor events requiring reliable power.

Technical Specifications

Key Electrical Ratings

16 A Standard Current	230 V Voltage	32 A Heavy-Duty Current	440 V Heavy-Duty Voltage
---------------------------------	-------------------------	-----------------------------------	------------------------------------

Ingress Protection (IP) Range

IP44 to IP67

Safety Features

Leakage protection switch, Fuse protection, Miniature circuit breakers, Mechanical interlock

Applications

Recommended Environments

- Construction sites
- Piers and terminals
- Workshops and manufacturing sites
- Humid or dusty environments
- Sewage treatment plants
- Outdoor events

Certifications

Compliance & Standards

CE • RoHS • CB • CEE/IEC Standard
