

Industrial Power Generator

This power generator is designed for a variety of industrial applications. Its durable enclosure protects against environmental factors and mechanical stress, ensuring long-term operation.

Overview

FDM3 Series Industrial Alternators

The FDM3 Series represents a line of robust and reliable power generators designed for diverse industrial applications. These units feature a durable enclosure, ensuring protection against environmental factors and mechanical stress, while emphasizing efficient power conversion and stable performance under varying load conditions. Engineered for long-term operation with minimal maintenance, they are equipped with multiple connection points for seamless integration into existing power systems.

Performance Metrics

Power Range (kVA)

80 kVA

Min Power

200 kVA

Max Power

Power Range (kW)

64 kW

Min Power

160 kW

Max Power

Technical Specifications

Key Design Features

- Durable protective enclosure
- Multiple connection points
- Stable performance under varying loads
- Low maintenance requirements

Frequency

50Hz, 60Hz

Application

Marine
