

Industrial Power Generator

This generator is designed for continuous power supply in industrial or commercial applications. It features a robust structural design suitable for large facilities and complex piping systems.

Overview

Heavy-Duty Industrial Power Solution

This industrial power generator is engineered for reliable, continuous power supply in demanding commercial and industrial environments. Designed for parallel operation, these heavy-duty units are optimized for facility-scale energy needs, featuring robust construction and integrated cooling and exhaust systems. Its reliable diesel-powered architecture ensures consistent performance for critical infrastructure and large-scale operations.

Technical Performance

Rated Power Output

500 kW

Continuous Output

550 kW

Standby Capacity

Operating Mode

Continuous • Parallel Capable • Industrial Grade

System Configuration

Fuel System

- External fuel tank integration
- High-capacity fuel processing
- Diesel compatible

Installation Features

Parallel Row Arrangement, Integrated Piping, High-Ceiling Compatible
