

Industrial Power Plug and Socket Set

This industrial plug and socket set is designed for heavy-duty applications. The splash-proof socket is rated for 16A at 110-130V and conforms to IEC 60309-2 standards.

Overview

Industrial Power Connectivity

These industrial plugs and socket-outlets are engineered for demanding electrical installations in extreme conditions. Designed to ensure maximum safety and reliability, they facilitate secure connection and disconnection of equipment in industrial environments. By preventing power breaks and minimizing maintenance needs, these components help maintain high productivity and operational continuity.

Technical Specifications

Current Rating Range

16 A

Minimum Current

600 A

Maximum Current

Key Features

- Waterproof construction
- Robust long-life design
- Splash-proof protection
- Secure locking mechanisms

Configuration Options

| Specification | Details |
|-------------------|--------------------|
| Pin Configuration | 2P+E, 3-pin, 5-pin |
| Voltage Range | 110-130V |
| Protection Type | Splash Proof |

Compliance & Standards

CE, IEC 60309-2, ISO 809-8
