

Industrial Pressure Pump

This pressure pump is designed for industrial applications. It features gauges, valves, and connecting pipes for monitoring and controlling pressure.

Product Overview

Industrial-Grade Pressure Performance

This industrial pressure pump is engineered for demanding heavy-duty environments. Featuring a robust support frame and reinforced protective casing, it ensures long-term operational stability. The system includes integrated precision gauges and valve controls to allow for meticulous monitoring of output pressure in critical industrial applications.

Technical Features

Application Type

Industrial • Heavy-Duty

Key Components

- Integrated pressure gauges
- Regulating valves
- Reinforced connection piping
- Support frame structure

Design Specifications

Design Characteristics

Protective casing, Rigid base frame, Industrial grade
