

Industrial Pressure Transmitter with Digital Display

This pressure transmitter provides precise and stable pressure readings. It features continuously adjustable zero and span for flexible configuration.

Overview

Industrial Precision Monitoring

The YSB3051 series pressure transmitter is designed for demanding industrial environments requiring accurate measurement of liquids, steam, and gases. Utilizing intelligent full-isolated conversion and digital compensation technology, the device ensures superior anti-jamming capabilities. It features an integrated digital display for real-time pressure monitoring with high precision standards.

Technical Specifications

Key Performance Metrics

0.5 % Precision Rating	36 VDC Power Supply	20 mA Output Signal
----------------------------------	-------------------------------	-------------------------------

Technology Features

- Intelligent full-isolated conversion technology
- Digital compensation technology
- High anti-jamming capability

Suitable Media

Liquid, Steam, Gas
