

Industrial Pressure Transmitter with Digital Display

This pressure transmitter accurately measures pressure and transmits data for monitoring and control systems. It features a digital display for local pressure readings and is designed for various industrial applications requiring precise pressure measurement.

Product Overview

Industrial Pressure Monitoring

This industrial-grade pressure transmitter features a durable, explosion-proof design suitable for demanding environments. It utilizes solid-state, patch-type circuit board technology to ensure high stability and minimal maintenance needs. The device provides precise data transmission through a standard two-wire 4-20mA DC signal, ideal for integration into existing control systems.

Technical Specifications

Shift Capability

Type	Range
Positive Shift	500%
Negative Shift	600%

Output Signal	4-20mA DC Two-Wire System
Key Features	High Accuracy, Explosion-proof, Adjustable Damping, Overpressure Protection, Digital Display

Certifications & Safety

Safety Standards

Ex • CE

Operational Suitability

- Explosive atmospheres
- Continuous all-day operation
- Harsh industrial environments
