

Industrial Process Control Instrument

This industrial electronic instrument is designed for process control and monitoring applications. It features a control panel with gauges, switches, and indicator lights.

Overview

Industrial Process Control Instrument

This industrial electronic instrument is designed for precise process control and monitoring applications. Housed in a durable green metal cabinet, it features a comprehensive control panel equipped with gauges, switches, and indicator lights for real-time operational oversight. The unit is integrated with a top-mounted cyclone separator and blower assembly, making it a robust solution for demanding industrial environments.

Technical Specifications

Key Components

- Cyclone separator
- Blower assembly
- Control panel
- Analog gauges
- Indicator lights

Housing Material	Metal cabinet
------------------	---------------

Finish Color	Green
--------------	-------

Operational Metrics

Interface Type	Manual Switches, Analog Gauges, Status Indicators
----------------	---
