

Industrial Reciprocating Piston Air Compressor

This air compressor effectively prevents oil cylinder issues. Designed for industrial and commercial use, it delivers reliable performance and long service life.

Product Overview

Industrial-Grade Compressed Air Solution

This heavy-duty single-stage reciprocating piston air compressor is engineered for reliability in demanding industrial environments. Featuring a high-efficiency monomer valve design and robust cast iron construction, it provides exceptional durability and heat dissipation. Integrated safety systems, including an oil outage alarm, ensure long-term equipment protection and safe operation for factory and automation applications.

Technical Specifications

Compression Type	Single Stage Reciprocating Piston
Drive Type	Belt Drive
Cooling System	Vane Cooling Fan System
Construction Material	High-grade Cast Iron

Key Features

Recommended Applications

- Factory automation
- Automotive maintenance
- Painting services
- General engineering

Safety Features

Oil Outage Alarm, Thermal Overload Protector, Safety Valve

Equipment Details

Model Identification	Z 80A/8
Portability	Yes
