

Industrial Refrigerated Air Dryer

This refrigerated air dryer is designed for industrial compressed air systems. It effectively removes moisture to supply dry air for pneumatic tools and machinery.

Product Overview

Industrial Air Treatment Solution

This refrigerated air dryer is engineered for demanding industrial applications, providing efficient moisture removal from compressed air systems. By eliminating condensation, it protects downstream pneumatic tools and machinery from corrosion and wear. The unit features a robust chassis with integrated supports, ensuring stability and durability in professional work environments.

Technical Specifications

Model Number	ED-10HF
Primary Function	Moisture removal from compressed air

Design & Features

Build Quality

- Robust industrial chassis
- Integrated structural supports
- Compact footprint

Monitoring & Control

Pressure Gauges, Control Panel, Indicator Lights

Applications

Suitable For

- Pneumatic tools
- Industrial machinery
- Compressed air systems
