

Industrial Refrigeration and Ventilation System

This industrial system combines air-cooled chillers and indoor climate control units. It offers comprehensive climate control for industrial and commercial applications, featuring ceiling-mounted air handlers and wall-mounted split systems.

System Overview

Industrial Climate Solutions

This comprehensive industrial refrigeration and ventilation system provides scalable climate control for a wide array of commercial and industrial environments. Featuring high-capacity air-cooled chillers integrated with sophisticated compressor modules, the system ensures consistent performance and thermal management. The setup supports diverse installation configurations, ranging from ceiling-mounted air handlers to flexible wall-mounted split units.

Compatible Applications

Industrial Processing, Commercial Climate Control, Warehouse Ventilation

Technical Configuration

Available Delivery Units

- Ceiling-mounted air handlers
- Wall-mounted split systems

Chiller Technology

Air-cooled chiller system

Control Infrastructure

Yes
