

Industrial Refrigeration and Ventilation Unit

This industrial unit provides both refrigeration and ventilation. Designed for large-scale cooling, it incorporates robust construction and efficient heat exchange technology.

Overview

Industrial-Grade Climate Control

This industrial refrigeration and ventilation unit is engineered for large-scale cooling applications in demanding commercial and industrial environments. Featuring a robust construction with integrated high-efficiency heat exchange technology, the system ensures reliable temperature regulation and optimal air circulation. The unit comes equipped with a dedicated electrical control panel to facilitate precise operational management and real-time monitoring.

Technical Specifications

Cooling System	Overhead cooling system
Compressor Configuration	Multi-compressor system
Suitable Applications	Commercial Cooling, Industrial Cooling, Large-Scale Ventilation

Features

Control System

- Integrated electrical control panel
- Precise temperature control
- Operational monitoring

Build Quality

Robust Construction • Industrial Grade
