

Industrial Refrigeration and Ventilation Unit

This floor-standing unit provides both refrigeration and ventilation. It is designed for industrial and commercial applications with a multi-tiered structure and digital control panel.

Product Overview

Industrial Refrigeration and Ventilation System

This floor-standing unit is designed specifically for demanding industrial and commercial environments requiring reliable climate control. The system integrates dual-functionality by combining high-capacity refrigeration with advanced ventilation capabilities. Featuring a centralized digital control interface and robust construction, it provides precise atmospheric regulation to maintain optimal operating conditions.

Performance Highlights

1 Floor-standing
Configuration

Design and Build

Key Physical Features

- Multi-tiered structural design
- Upper integrated ventilation grille
- Lower horizontal air-flow slats
- Durable white finish
- Centralized digital control panel

Compliance and Standards

Certification & Compatibility

Industrial Grade, Commercial Application, Digital Controls
