

Industrial Refrigeration and Ventilation Unit

This industrial unit is designed for refrigeration and ventilation purposes. It is constructed with multiple panels, fans for air circulation, ventilation grilles, and electrical components, suitable for outdoor installation.

Product Overview

Industrial Climate Control Solution

This industrial-grade unit is engineered for high-performance cooling and climate regulation in demanding commercial or industrial environments. Built with a robust, weather-resistant framework, it incorporates advanced air circulation and heat dissipation systems to ensure consistent thermal management. The unit is designed for reliable outdoor installation and optimized for durability in professional infrastructure settings.

Technical Specifications

Key Components

- Integrated Compressors
- High-Efficiency Heat Exchangers
- Top-mounted Circulation Fans

Application Scope

Commercial Cooling • Industrial Climate Control • Thermal Management

Installation

Outdoor

Construction

Reinforced Base Frame, Weather-resistant Panels, Integrated Ventilation Grilles
