

Industrial Refrigeration and Ventilation Unit

This industrial unit provides both refrigeration and ventilation for controlled environments. It features a stainless steel construction and a control panel for precise adjustments.

Product Overview

Industrial Climate Control Solution

This industrial refrigeration and ventilation unit is engineered for maintaining precise controlled environments in demanding settings. Constructed with robust stainless steel, the unit offers exceptional durability and superior resistance to corrosion. It features an integrated control panel for intuitive adjustment of temperature and ventilation settings, ensuring versatility for various industrial applications.

Technical Specifications

Material Composition	Stainless steel
Primary Functions	Refrigeration, Ventilation, Climate Control

Operational Features

Suitable Applications

- Industrial climate control
- Controlled environment maintenance

Control Interface	Manual adjustment control panel
