

Industrial Refrigeration Compressor

This compressor is designed for refrigeration and ventilation systems. It features a durable construction with a flanged base for secure mounting.

Product Overview

Industrial-Grade Performance

This robust industrial refrigeration compressor is engineered for reliability in demanding ventilation and cooling systems. Built with durable materials and a secure flanged base, it ensures stable operation across a range of industrial environments. Its distinct design combines professional-grade components with a corrosion-resistant blue finish for long-lasting service life.

Technical Specifications

Visual Characteristics

- Blue body coating
- Yellow-colored shaft

Key Design Features

Flanged base, Industrial construction, Durable finish

Application

Suitable Applications

Refrigeration systems • Ventilation systems • Industrial gas compression
