

Industrial Respiratory Protection Mask

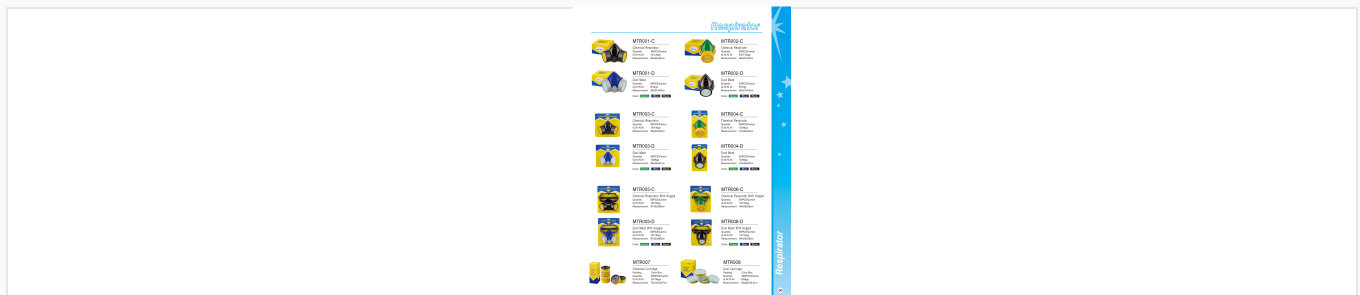

This respiratory protection mask provides essential filtration against airborne contaminants. Suitable for various industrial and safety applications, it ensures a secure fit.

ADDITIONAL IMAGES

Product Overview

Comprehensive selection of industrial safety masks including chemical-rated and goggle-integrated models.

Industrial Respiratory Protection

This range of high-performance respiratory protection equipment is designed for demanding industrial and agricultural environments. The product line includes versatile chemical respirators, dust masks, and specialized models featuring integrated goggles for enhanced eye safety. These masks offer robust filtration against hazardous particulates and chemical substances while ensuring user comfort and clear visibility.

Key Features

Available Colors

Green • Blue • Black

Available Protection Types

Chemical Respirator, Dust Mask, Mask with Goggle, Filter Cartridges

Logistics and Packaging

Professional filtration masks designed for high-volume industrial use.

Common Packaging Specifications

Model Series	Qty/Carton	Gross Weight (kg)
Dust Mask Series	50	13
Chemical Respirator Series	50	15
Standard Disposable	200	6
Bulk Filter Mask	1000	5

Performance

Application Fields

- Industrial safety
- Agricultural protection
- Emergency response
- Dust and particulate filtration
- Chemical handling
