Overview

Industrial Ribbon Mixer

This industrial ribbon mixer is designed for the efficient blending of dry materials in various applications, including food processing, chemical, and feed production. It features a horizontal trough with a rotating ribbon agitator that ensures thorough axial and radial mixing. Built for reliability, the machine offers consistent performance with a wide-open discharge port to minimize material residue and ensure easy handling.

7 %

Coefficient of Variation (CV)

Applications

Suitable Industries

Feed Production, Premix Feed, Chemical Processing, Food Processing, Flour Milling

Technical Specifications

Model Specifications

Model	Output (kg/p)	Power (kW)
SLHY1	500	7.5
SLHY2.5	1000	15
SLHY5	2000	30

Design Features

Key Features

- Wide open door discharge port
- Minimized material leftover
- High sealing performance
- Robust horizontal trough design
- Heavy-duty motor and drive system
