

Industrial Rice Milling Plant

This rice mill plant includes continuous equipment for cleaning, husking, rice and paddy separation, polishing, and grading. It is designed for high white rice yield and excellent polished rice quality.

Overview

Industrial Rice Milling Solution

This industrial-grade rice milling plant provides a continuous, integrated process for grain transformation. The system encompasses specialized stages for cleaning, husking, paddy separation, whitening, and polishing to ensure high-quality output. Engineered for large-scale production, this unit emphasizes high yield rates and efficient processing through advanced machinery.

Processing Stages

Integrated Milling Stages

- Cleaning
- Husking
- Paddy separation
- Whitening
- Polishing
- Grading

Technical Features

Operational Capabilities

- Integrated pneumatic conveying
- Precision milling components
- Continuous operation design
- High white rice yield

Materials & Safety

Food-grade materials, Robust construction
