

Industrial Roasting Crane

This heavy-duty crane is designed for roasting and material handling in industrial environments. It features a robust overhead structure with a trolley system for precise positioning and movement of heavy loads.

Product Overview

Industrial Multi-Function Roasting Crane

This heavy-duty multi-function crane is engineered specifically for demanding material handling and roasting environments. It features a robust overhead structure paired with a precision trolley system to ensure accurate load positioning. Designed for high-temperature durability, this crane provides reliable performance in the most challenging industrial operations.

Technical Specifications

Application	Industrial roasting and material handling
Operational Capability	High-Temperature Ready, Industrial Grade, Heavy-Duty

Design Features

Handling Attachments

- Multiple lifting hooks
- Specialized material handling attachments

Structure Type	Overhead structure
Movement Mechanism	Yes
