

Industrial Rotary Cutting Blade

This precision-engineered circular metal blade is designed for industrial cutting applications. Constructed from high-grade steel, the blade offers exceptional durability and resistance to wear.

Product Overview

Precision Industrial Rotary Cutting Blade

This precision-engineered circular metal blade is designed specifically for demanding industrial cutting applications. Constructed from high-grade steel, it ensures exceptional durability and resistance to wear during high-speed operations. The design features a central aperture and precisely spaced mounting holes to guarantee secure, balanced attachment for accurate and clean cutting results.

Technical Specifications

Material	High-grade steel
Design Features	Circular Geometry, Central Aperture, Balanced Mounting Holes, Precision-Engineered

Performance

Primary Applications

- High-speed rotary cutting
- Industrial manufacturing processes
- Precision metal cutting

Key Performance Indicators

1 High

Durability Rating

1 Smooth

Surface Finish
