

Industrial Rubber Mixing Mill

Heavy-duty rubber mixing mills are designed for industrial applications. These machines feature robust construction with large rollers, gearboxes, and control panels.

Overview

Industrial Rubber Mixing Mill

The XK-560 Planet Rubber Mixing Mill is engineered for high-performance industrial rubber processing. Built with a heavy-duty chassis, large rollers, and high-torque gearboxes, this machine provides the reliability and precision required for consistent rubber compound mixing. It is equipped with integrated safety systems and advanced control panels to ensure operational efficiency in demanding manufacturing environments.

Technical Specifications

Model	XK-560
Equipment Type	Planet Rubber Mixing Mill

Key Features

Mechanical Components

- Large-diameter processing rollers
- High-torque industrial gearbox
- Advanced control interface

Operational Features	Heavy-duty construction, Precision controls, Safety-integrated, Industrial processing
