

Industrial Rubber Roller

Precision-engineered rubber rollers are designed for diverse industrial applications. The rollers have a durable rubber coating on a metallic core, ensuring optimal performance and longevity.

Product Overview

Industrial Precision Engineering

These precision-engineered rubber rollers are designed to provide consistent performance across a wide range of industrial applications. Featuring a durable rubber coating bonded to a robust metallic core, these rollers ensure exceptional longevity and reliability in demanding environments. They are specifically crafted to meet the rigorous requirements of printing, laminating, and material handling processes.

Technical Specifications

Construction Materials

- Durable rubber coating
- Metallic core

Customization Options

Variable Colors • Multiple Sizes

Recommended Applications

Printing, Laminating, Material Handling
