Product Overview

Industrial Rubber Seals

These industrial rubber seals are precision-engineered to provide a reliable, leak-proof barrier in diverse mechanical systems. Crafted from premium compounds like NBR, HNBR, EPDM, and Viton, they deliver exceptional resistance to extreme temperatures, chemicals, and aging. Available in multiple international standards, these seals are essential for maintaining pressure in hydraulic and pneumatic equipment.

Material & Properties

Key Performance Features

High-Temperature Resistant • Acid-Alkali Resistant • Anti-aging • Non-toxic • Odorless

Available Materials

NBR, HNBR, EPDM, SILICONE, VITON, NR

Standards & Compatibility

Compliance Standards

- AS568
- JIS B 2401
- BS1516
- PGO
- GBO
- GB 1235
- GB/T3452
- DIN 3771

Seal Types Offered

- O-rings
- Rubber seals
- Rubber bands
- Oil seals
- Water seals
- Rubber gaskets
