

Industrial Safety Footwear

These safety shoes are designed for hazardous work environments. They feature a steel toe cap for impact protection and a slip-resistant rubber outsole for enhanced traction.

Product Overview

Industrial-Grade Protection

These industrial safety shoes are engineered for high-risk work environments, providing essential protection against impact and compression hazards. Featuring a durable leather upper and a slip-resistant rubber outsole, they offer reliable traction and long-lasting wear in demanding conditions. Designed with user comfort in mind, the breathable lining and padded support ensure the wearer stays comfortable during extended shifts in the oil, mining, and construction industries.

Technical Specifications

Available Colors

Black

Safety Features	Steel Toe Cap, Slip-Resistant, Oil-Resistant
Upper Material	Robust Leather
Outsole Material	Rubber

Application & Use

Primary Applications

- Oil Industry
- Mining Industry
- Construction
- Power Industry
