

Industrial Safety Helmet

This safety helmet is made from high-density polyethylene (HDPE) for superior impact resistance and durability. It features a six-point suspension system for optimal comfort and a secure fit.

Overview

Professional Industrial Protection

The HM504 Industrial Safety Helmet is engineered for high-performance head protection in demanding construction and industrial environments. Constructed from high-density polyethylene (HDPE), this helmet combines superior impact resistance with a lightweight profile to reduce user fatigue during long shifts. With a six-point suspension system and adjustable fit, it ensures both comfort and stability for diverse workplace applications.

Technical Specifications

Material	High-Density Polyethylene (HDPE)
Suspension Type	6-point suspension system
Electrical Resistance	Yes

Compliance & Standards

Safety Standards	ANSI Z89.1-2014, Type I, Class E
------------------	----------------------------------

Features

Key Benefits

- Superior impact resistance
- Adjustable straps for custom fit
- Lightweight design for extended wear
- Multiple color options available
