

Industrial Sand Blasting Cabinet

This industrial sand blasting cabinet is designed for surface preparation and cleaning. Its enclosed structure contains abrasive media and dust, while the internal lighting and dust collection system ensure a clean and safe operation.

Product Overview

Industrial Surface Preparation Solution

This industrial sand blasting cabinet is expertly designed for comprehensive surface preparation and cleaning tasks. The fully enclosed unit ensures that abrasive media and dust are effectively contained, promoting a cleaner and safer working environment. Built from heavy-duty steel, it provides the rugged durability required for demanding applications like rust removal, paint stripping, and precision surface etching.

Technical Specifications

Body Material	Heavy-duty steel
Core Features	Enclosed structure, Dust collection system, Internal lighting, Loading access door

Application

Primary Applications

- Rust removal
- Paint stripping
- Surface etching
- General surface cleaning
