

Industrial Screw Oil Press

This industrial screw oil press is designed for continuous oil extraction. It features a robust frame, a high-capacity pressing chamber with screw conveyor, and an efficient oil collection system.

Product Overview

Industrial Screw Oil Press (ZY338)

The ZY338 industrial screw oil press is engineered for continuous and efficient oil extraction from various oil-bearing seeds and nuts. Designed for large-scale production facilities, this machine focuses on maximizing yield through high-capacity processing and minimizing residual oil content in the cake. Its robust mechanical construction is complemented by an automated control system, ensuring reliable performance, lower power consumption, and simplified maintenance routines.

Technical Performance

Capacity per 24 hours

280 t

Capacity

Residual oil in cake	15 %
Total Power Configuration	185 + 3 + 1.1 kW

Key Features

Performance Advantages	High Capacity, Low Residual Oil, Low Power Consumption, Easy Maintenance
------------------------	--

Equipment Design

Machine Components

- Robust heavy-duty frame
- High-capacity pressing chamber
- Continuous screw conveyor system
- Integrated oil collection system
- Automated control panel
