

Industrial Seal for Packaging Machinery

This high-performance industrial seal is designed for demanding applications within packaging machinery and other industrial equipment. It is engineered to withstand operating temperatures ranging from -20°C to 100°C and pressures up to 0.5 MPa.

Overview

High-Performance Industrial Seal

This industrial seal is precision-engineered for demanding applications within packaging machinery and various industrial equipment. Designed to deliver reliable sealing performance in challenging environments, it ensures operational integrity and an extended service life. With robust construction and versatile compatibility, this component is an essential choice for maintaining equipment efficiency.

Technical Specifications

Key Performance Metrics

0.5 MPa
Max Pressure

5 m/sec
Max Speed

Operating Temperature Range	-20°C to 100°C
Maximum Pressure	0.5 MPa
Maximum Operating Speed	5 m/sec

Compatibility

Available Shaft Sizes

- 14
- 16
