

# Industrial Second Drying Tower

This industrial drying tower is designed for efficient moisture removal in industrial processes. It is certified with ASME U/U2/N/NPT, ISO9001, and DNV CLASSIFICATION SOCIETY certificates.

## Product Overview

### Industrial Second Drying Tower

This industrial second drying tower is a robust piece of specialized equipment designed for demanding high-pressure environments. Constructed from high-grade 16MnR material, it offers reliable performance for petrochemical and refinery applications. Its significant scale and engineering specifications make it an essential component for large-scale industrial processing facilities.

## Technical Specifications

### Design Pressure

**2.4 Mpa**

Design Pressure

Material	16MnR
Design Temperature Range	-10 to 75°C

## Physical Dimensions

Dimensions	\$2100x12683x20
Weight	88 T
