

Industrial Sewing Machine for Apparel and Footwear

This industrial sewing machine is designed for manufacturing garments, shoes, and accessories. It features a computerized control panel for stitch adjustments and a high-speed motor for efficient production.

Overview

Industrial Sewing Solution

This high-speed industrial sewing machine is engineered for professional apparel, footwear, and accessory manufacturing. It features a computerized control panel for precise stitch adjustments and an integrated lubrication system to ensure smooth, reliable operation. Designed for versatility, the machine accommodates various fabric thicknesses through adjustable presser foot pressure and a built-in needle positioning system.

Technical Specifications

Suitable Applications

- Garment Manufacturing
- Footwear Production
- Accessories Assembly
- General Textile Industry

Key Features

Computerized Control, Integrated Lubrication, Needle Positioning System, Adjustable Presser Foot

Performance

Operational Capabilities

1 Integrated
