

Industrial Sewing Machine for Garment Production

This industrial sewing machine is designed for apparel and textile manufacturing. It features adjustable stitch length, high-speed stitching, and an automatic lubrication system.

Product Overview

Industrial Garment Production Solution

This industrial sewing machine is engineered for high-performance apparel and textile manufacturing environments. It features a heavy-duty construction designed to support continuous, reliable operation during demanding production cycles. With high-speed stitching capabilities and an automatic lubrication system, it ensures precision and durability for professional garment production and repair applications.

Key Features

Performance Features

- Adjustable stitch length
- High-speed stitching performance
- Integrated automatic lubrication system
- Heavy-duty industrial construction

Performance Metrics

Operational Specs

1 Continuous
Duty Cycle
