

# Industrial Sewing Machine for Garments and Shoes

This industrial sewing machine is designed for manufacturing garments, shoes, and accessories. It features adjustable settings suitable for various fabric types and thicknesses, making it efficient for both high-volume production and intricate designs.

## Overview

### Industrial Precision Stitching

This industrial sewing machine is engineered specifically for the high-volume manufacturing of garments, shoes, and accessories. It features a robust construction designed to handle various fabric types and thicknesses with consistent precision. Equipped with a powerful motor and intuitive controls, it supports both efficient production workflows and intricate design work.

## Technical Specifications

Model Identifier	BS20U65
Certifications	CE

## Performance

### Suitable Applications

- Garment manufacturing
- Shoe production
- Accessory fabrication
- High-volume production
- Intricate designs

### Key Features

Robust construction • Precision stitching • Adjustable settings • Powerful motor
