

Industrial Sewing Machine for Garments and Shoes

This industrial sewing machine is designed for producing garments, shoes, and accessories. It utilizes a multi-thread overlock system and a precision needle system to ensure consistent, high-quality stitching.

Overview

Industrial Sewing Machine

This industrial sewing machine is engineered specifically for the demanding requirements of garment, shoe, and accessory manufacturing. It features a sophisticated multi-thread overlock system combined with a robust feeding mechanism to ensure consistent, high-quality output. Designed for versatility, it handles various fabric types and production volumes, making it an essential asset for apparel and textile production lines.

Technical Specifications

Key Construction Features

- Robust feeding mechanism
- Precision needle system

Stitch System	Multi-thread overlock
Fabric Compatibility	Garments, Shoes, Accessories, General Textiles
Stitch Settings	Yes
